Re: Voluntary Recall for Peak Refuel

At Peak Refuel, the quality of our products and your safety are of utmost importance! We strive to provide not only the best tasting meals, but the highest quality.

The U.S. Department of Agriculture announced a product recall involving chicken that was shipped to you. The fully cooked chicken has been recalled by BrucePac, one of our suppliers due to the possible presence of *Listeria monocytogenes*. Consumption of food contaminated with *Listeria monocytogenes* can cause listeriosis, a serious infection that primarily affects older adults, persons with weakened immune systems, and pregnant women and their newborns.

Currently, there have been no illnesses or adverse reactions reported due to consumption of the recalled products.

The products listed below were shipped to you and are affected by the recall. You will find the referenced lot number located on the back of the pouch in the top left corner. We request that you review your inventory records and segregate and place the product on HOLD. If the product has been distributed, please identify your customers, and notify them at once of this product recall.

Please confirm the product quantities placed on HOLD. We are requesting that the product be destroyed, and records of destruction, including all associated costs, be provided back to Peak Refuel so we can issue credit.

We sincerely apologize for the disruption this has caused. We appreciate your attention to this matter. Please contact austin@peakrefuel.com with any questions and requests for replacement orders.

Thanks,
Peak Refuel
